In 2016, Khrunichev and ILS announced the development of two-stage Proton variants, the Proton Medium and the Proton Light, to broaden Proton’s addressable market with competitive offerings in the 3.5 to 5.0t range. This briefing will discuss the launch site changes related to these new variants:

- Summary Presentation of new Proton variants
- Generalities about Baikonur Cosmodrome (with emphasis on Updates and Improvements since GBSF 2013)
- Changes induced by operation of new Proton variants.
- Conclusions
